

Major GPA Calculation Worksheet for Science Education

This worksheet can be used to calculate your Professional Education, Specialized Education, and major GPAs.

Step 1: enter the numerical value assigned to each grade in column A: A=4 points, B=3 points, and C= 2 points.

Step 2: enter the number of credit hours for each course in column B.

Step 3: multiply the grade value of the course by the credit hours to determine the grade points for that course (column A x column B= grade points). This product should be recorded in column C.

Step 4: add column B to determine the total sum of credit hours and column C to determine the total sum of grade points. These totals should be recorded in box 1 and box 2.

Step 5: divide the total number of grade points by the total number of credit hours (box2/box 1). This is your GPA.
